

Opioid Abatement

Summary

Rapha Farm is requesting \$8,500 to sponsor sliding-scale therapy sessions for the following populations:

Therapy sessions for those affected by or experiencing OUD (adults and children, additional subpopulation of women who are pregnant, may become pregnant, or are parenting)

Therapy sessions for those with co-occurring SUD/MH issues (adolescents and adults)

Estimated coverage of 50 to 100 sessions, depending on the sliding scale rate determined for clients/families. Typical no-reduction rate is \$170, with income level determining percentage of rate paid by individual/family. Minimum rate is \$25.

Outcomes

80% of clients' wellness goals met or exceeded when attending at least 8 therapy sessions.

(Wellness domains include Family/Friends, Faith, Medical, Movement, Work, Emotion, Nutrition)

Applicable Regulations

KRS 15.291

(b) Provide funding for any project which:

1. Supports intervention, treatment, and recovery services provided to persons:

a. With OUD or co-occurring SUD/MH issues; or

b. Who have experienced an opioid overdose;

15. Treats mental health trauma issues resulting from the traumatic experiences of opioid users or their family members;

17. Provides recovery services, support, and prevention services for women who are pregnant, may become pregnant, or who are parenting with OUD or co-occurring SUD/MH issues;

At Rapha Farm, we believe too many people are carrying past hurt alone, so we come alongside them with the power of equine and garden therapies.

Founded in Oldham County in 2022, we utilize equine-facilitated psychotherapy and horticultural means (planting, growing, botanical dyeing, paper making groups, etc) at various locations in Oldham, Shelby, and Jefferson Counties.

Throughout 2025, through the dedication of our part-time leadership, we successfully facilitated 50 individual and group therapeutic sessions, engaged over 20 people in more than 200 volunteer hours, and hosted 10 workshops focusing on horticultural means for approximately 60 adults, while also delivering 60 hours of nature-based education to 60 local preschoolers.

Our vision for 2026 includes providing:

120 hours of clinical therapy,
250 hours of community volunteerism, and
impacting 225 unique individuals via our specialized programs

Equine services are evidence-supported to provide resilience and empathy, improve relationships and improve mental wellness for populations suffering from PTSD, ACEs (Adverse Childhood Experiences), depression, anxiety, ADHD and other issues.

Partners in 2026 have included:

Thoroughbred Retirement FDTN
Yew Dell Botanical Gardens
Richwood Nursing Facility
Northeast YMCA Childhood Development Center
Crossroads Pregnancy Resource Center

Rapha Farm is an active participant of the Oldham County Chamber of Commerce as well as being on the advisory council of the Oldham County Health Department's Healthy Oldham County.

KRS 15.291

(b) Provide funding for any project which:

16. Engages nonprofits, the faith community, and community coalitions to support prevention and treatment, and to support family members in their efforts to care for opioid users in their family;

We plan to submit a second proposal at a later date, focusing on Positive Childhood Experiences to combat Adverse Childhood Experiences (risk factors for OUD and MH issues). However, we will do so after we have more formalized partnerships with agencies working with families.
